

## **GGSB PRELIMINARY EXAMINATION**

### **INSTRUCTIONS:**

There are 10 questions to choose from. You are required to prepare answers for 3 of these 10 questions. There is no required question. You can prepare to 6 PowerPoint slides per question.

We have provided several references for each question to get you started. It is assumed that you will identify and analyze additional references in preparing for the exam.

At the beginning of the exam, you can tell your committee which of the three questions you would like to answer first. The committee will then decide the order in which the remaining two questions will be discussed.

Remember that the questions will serve as a focus for discussion, but that the discussion may be quite free ranging. The suggested references are provided only as starting places. To answer the questions you will need to find and read additional references. You are free to discuss the questions with others students and faculty members.

Best wishes to you on exam day!
